DEPARTMENT OF COMMERCE

Patent and Trademark Office

Public Hearing and Request for Comments on the Standard of Nonobviousness

Agency: Patent and Trademark Office, Commerce

Action: Notice of hearing and request for public comments

Summary: The Patent and Trademark Office (PTO) is conducting a review of the standard of nonobviousness by which inventions are judged to determine whether a more rigorous standard of nonobviousness is needed. As part of this review, the PTO is interested in obtaining public comment on the current standard of nonobviousness both as it is applied by the PTO and as interpreted by the Federal courts, as well as the impact of this standard on promoting the progress of science and useful arts. Interested members of the public are invited to testify and to present written comments on any of the topics of discussion outlined in the supplementary information section of this notice.

Dates: A public hearing will be held on July 20, 1994, at 9:00 a.m. Those wishing to present oral testimony at the July 20, 1994, hearing must request an opportunity to do so no later than July 8, 1994. Any written comments by those persons offering testimony at the hearings and related to that testimony should be submitted on or before July 8, 1994. Other written comments should be received by the PTO on or before August 31, 1994.

Addresses: Those interested in presenting written comments on the topics contained in the supplementary information section of this notice, or any other related topic, should address their comments to the Commissioner of Patents and Trademarks, marked to the attention of Kathleen G. Dussault, Attorney-Advisor, Office of Legislation and International Affairs. The hearings will be held in Marriott's Crystal Forum, a part of the Crystal City Marriott Hotel located in The Underground, 1999 Jefferson Davis Highway, Arlington, Virginia. Comments submitted by mail should be sent to Commissioner of Patents and Trademarks, Box 4, Patent and Trademark Office, Washington, D.C. 20231. Comments can be sent by electronic mail to Internet address *comments-obviousness§uspto.gov*. Comments may also be submitted by telefax at (703) 305-8885. Written comments should include the following information:

-Name and affiliation of the individual responding;

-An indication of whether comments offered represent the views of the individual's organization or are the respondent's personal views; and

-If applicable, the nature of the respondent's organization (e.g., business, law Firm, trade group, university, non-profit organization) and principal areas of business or research activity.

Parties offering testimony or written comments are asked to provide their comments in machine-readable format in one of the following file formats: ASCII text, WordPerfect for DOS or Windows version 4.2 or 5.x, or Word for Macintosh version 4.0 or 5.x.

Persons wishing to testify must notify Kathleen G. Dussault no later than July 8, 1994. Ms. Dussault can be reached by mail sent to her attention addressed to the Commissioner of Patents and Trademarks, Box 4, Washington, D.C. 20231; by phone at (703) 305-9300; or by telefax at (703) 305-8885. No requests to testify will be accepted through electronic mail.

I. Background

Recent debate has focused on whether United States patent policy is being effectively served by the current standard of nonobviousness both as it is applied by the Patent and Trademark Office during patent examination and as it has been interpreted by the Federal courts. Under 35 U.S.C. § 103, a patent may not be obtained "... if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains."

In *Graham v. John Deere & Co.*, 383 U.S. 1 (1966), the Supreme Court defined a three-part test to be followed to determine the nonobviousness of an invention under 35 U.S.C. § 103. Under this test, (1) the scope and content of the prior art are to be determined; (2) the differences between the prior art and the claims at issue are to be ascertained; and (3) the level of ordinary skill in the pertinent art is to be resolved. According to the Court, secondary considerations such as commercial success, long felt but unsolved needs, failure of others, etc., might be utilized to give light to the circumstances surrounding the origin of the subject matter sought to be patented. The Court noted that as indicia of obviousness or nonobviousness, secondary considerations may have relevancy.

Some critics have charged that the *Graham v. John Deere* standard of nonobviousness has been changed by decisions of the Court of Appeals for the Federal Circuit. For example, it is argued that secondary considerations have been given too much weight when determining the nonobviousness of an invention to the extent that an invention with strong commercial success will be found not obvious despite appearing so in light of prior art. Other critics charge that the scope of the prior art to be considered when evaluating the obviousness of an invention has been improperly narrowed, precluding obviousness from being established by combining the teachings of the prior art to produce the claimed invention absent some express teaching or suggestion supporting the combination.

The PTO has the burden of establishing a case of *prima facie* obviousness to support a prior art rejection under 35 U.S.C. § 103. This burden can be met when the teachings from the prior art suggest the claimed subject matter to a person of ordinary skill in the art. Once established, the applicant must present evidence or arguments to rebut the Examiner's *prima facie* case. For example, an applicant may argue that there was no teaching or suggestion in the prior art to combine the references in the manner suggested by the Examiner to render the claimed invention obvious. The applicant may also rebut the Examiner's case of *prima facie* obviousness by demonstrating that the references cited by the Examiner teach away from the claimed invention.

Some critics argue that more guidance is needed to define when a *prima facie* case has been established and how it may be successfully rebutted.

It has also been suggested that the standard of nonobviousness has been inappropriately lowered. Alleged effects of this "lowered" standard include a decrease in the perceived stature of patented inventions (e.g., patents are being granted on inventions industry views as being trivial, simple or straightforward). Recent debate has also focused on the propriety of the *de novo* standard of review applied by the Court of Appeals for the Federal Circuit and whether greater deference should be given to the obviousness determinations of the PTO and the District Courts on appeal.

To resolve the issues presented, the PTO will conduct a public hearing to examine the issue of nonobviousness in the context of whether or not the current standard of nonobviousness effectively promotes United States patent policy and whether a more rigorous standard for awarding U.S. patents should be pursued.

II. Topics for Discussion

The hearing will address the following topics:

1. Justifications and rationale for and against the nonobviousness standard applied by the PTO and the Federal courts, including:

(a) Is a more rigorous standard of nonobviousness needed? If so, how should the standard be defined?

(b) Should the current standard of nonobviousness be administered differently?

(c) Is the standard of nonobviousness applied differently among the different examining groups within the PTO?

(d) Should the standard of nonobviousness vary according to the field of technology involved?

(e) What role should secondary considerations, such as commercial success, unexpected results, etc., play when determining the nonobviousness of the invention?

(f) Whether a *prima facie* case of obviousness based upon a combination of references should necessarily require "motivation" to combine the teachings of the prior art disclosures? Why or why not? What other standard or standards for evaluating the propriety of combining the teachings of references might be appropriate?

(g) Is the "ordinary level of skill" in the art being interpreted and applied correctly, and if not, what changes are needed?

(h) Whether obviousness determinations should be subject to *de novo* review on appeal to the Court of Appeals for the Federal Circuit? If not, what standard of review should apply?

2. Desirable characteristics of specific guidelines regarding the burden of proof needed to rebut an Examiner's *prima facie* case of obviousness.

(a) Is there is a need for more specific guidelines to govern the burden of proof to be followed in determining the nonobviousness of an invention? If so, what should they be?

3. Impact of a more rigorous standard of nonobviousness on promoting industrial and technological progress in the United States and strengthening the national economy.

(a) Would a stricter standard of nonobviousness help or hinder industrial and technological progress in the United States? If so, how?

(b) Is the current standard of nonobviousness applied by the PTO and interpreted by the Federal courts having a positive or negative impact on industrial and technological progress in the United States?

(c) Are problems being experienced in particular areas of technology as a result of the standard of nonobviousness applied by the PTO? If so, what are they?

(d) What would be the effect of a more rigorous standard of nonobviousness on the ability of industry to compete in the international markct?

III. Guidelines for Oral Testimony

Individuals wishing to testify must adhere to the following guidelines:

1. Anyone wishing to testify at the hearings must request an opportunity to do so no later than July 8, 1994. No one will be permitted to testify without prior approval.

2. Requests to testify must include the speaker's name, affiliation (if any), phone number, fax number (if available), mailing address, and the questions in each topic that the speaker intends to address in his or her testimony.

3. Time allocated to each speaker will be determined after the final number of speakers has been determined.

4. Speakers must provide a written copy of their testimony for inclusion in the record of the proceedings no later than August 31, 1994.

5. Speakers must adhere to rules established for testimony. These rules will be provided to all speakers no later than July 15, 1994.

A schedule providing approximate times for testimony will be provided to all speakers no later than July 15, 1994. Speakers are advised that the schedule for testimony will be subject to change during the course of the hearing.

Response Requested to 1993 Patent Examiner's Action Survey

As part of the continuing quality reinforcement efforts of the Patent and Trademark Office, the Office has sent out a Patent Action Survey Form with each Patent Examiner's Office action mailed during a period of several weeks during December, 1993-January, 1994. **If you have received one or more of these forms, please complete each one, no later than the time of response to the Office action being surveyed.**

The survey is intended to determine whether Office actions are perceived to be clear and complete on certain specific and important items related to patent examining practices and procedures. The results of the survey will be used in the development of Office training programs. The survey is a follow-up to the Patent Action Surveys conducted in 1991 and 1992. Where training is provided to address identified deficiencies in performance, follow-up surveys are intended to be conducted in the future to determine whether the training was effective enough to improve performance in the measured areas.

The Survey Form is brief and easy to complete and does not permit identification of the respondent or of the particular application involved. The Survey Form may be completed at the time of response to the Office Action. It is possible that a practitioner may receive many Office Actions containing a Survey Form during the survey period. To have results that are meaningful, the Office needs a high response rate. Therefore, it is **important** that patent practitioners complete each survey form **no later than the time of response to the Office action being surveyed**. To assure that this form is completed and mailed back to the address indicated on the Survey Form, it would be desirable for patent practitioners to have their office managers/docketing personnel take appropriate steps to keep the form and Office action together for the practitioner's benefit.

Your cooperation in completing the Survey Form is appreciated.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections. All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
